

Douglas Kelley

Biosphere & Climate Dynamics Modelling

Summary

e: douglas.i.kelley@gmail.com
w: douglask3.github.io
m: +44 (0) 7936 726 819

Academic qualifications

PhD Ecology

2014

Macquarie University, Department of Biological Sciences, Ryde, NSW, Australia
Thesis: Modelling Australian fire regimes

MSc Earth System Science

2008

University of Bristol, Department of Earth Sciences, UK
Dissertation: Statistical modelling of global fire regimes.

Recent Employment History

Postdoctoral Research Assistant

Apr 2015-present

Department of Geography & Environmental Science, University of Reading, UK

Postdoctoral Research Assistant

Jun 2014-Mar 2015

Department of Biological Sciences, Macquarie University, Ryde, NSW, Australia

Publication Statistics

Total Citations: 196 H index: 6 i10 index: 4

Examples of Awards won

Macquarie University Research Excellence Scholarship

2010-2014

Macquarie University, Ryde, NSW, Australia

Postgraduate Research Fund (PGRF)

2013

Macquarie University, Ryde, NSW, Australia

Current Research Interests

Vegetation-climate dynamics and ecosystem modelling, including:

- Fire dynamics and fire-climate-vegetation interactions
- Wildfire impacts (on i.e. vegetation, carbon-cycle, hydrology)
- Vegetation disturbance resistance/protection and recovery
- Vegetation model benchmarking and diagnosis
- Plant resource allocation strategies

Skills

Programming

- Fortran
- C++
- C
- R
- Python
- Matlab
- Shell

See examples at github.com/douglask3 and bitbucket.org/douglask3

Web Design & Publishing

- html
- CSS
- PHP
- Markdown
- Python/R for web-page generation
- Wordpress
- Concrete5
- Latex
- Illustrator
- Photoshop
- GIMP
- Scribus
- ms/open of office

See examples at douglask3.github.io/pages/websites

Summary

Skills Continued

Software Tool development

I have developed several software package tools related to my research, and to help track project work flows

See examples at douglass3.github.io/pages/tools

Academic qualification

PhD Ecology Modelling Australian fire regimes

2010-2014

Macquarie University, Department of Biological Sciences, Ryde, NSW, Australia
Benchmarking and developing the LPX Dynamic Global Vegetation Model (DGVM) to improve the simulation of fire and fire-vegetation interaction. Using this new version of LPX to simulate fire, vegetation and carbon dynamics in Australia over the 21st century. Thesis can be downloaded from www.goo.gl/9YjwKw

MSc Earth System Science

Main dissertation: Wildfires as part of the global carbon cycle - quantitative analysis using data assimilation

2007-2008

University of Bristol, Department of Earth Sciences, UK
Other subjects covered: Earth system modelling; Natural hazards; Remote sensing & GIS; Isotopes and other Earth System tracers; Climate change science and policy

BSc (Hons.) Physics

Main dissertation: Modelling atmospheric effects on starlight

2002-2007

University of Warwick, Department of Physics, UK

Employment History

Postdoctoral Research Assistant

Apr 2015-present

Department of Geography & Environmental Science, University of Reading, UK

Simulating present and future fire regimes using a coupled dynamic global vegetation model (DGVM) and process-based fire model.

Postdoctoral Research Assistant

Oct 2014-Apr 2015

Cafe M Research Group, Department of Biological Sciences, Macquarie University, Ryde, NSW, Australia

Testing conceptual phenology and plant carbon allocation models under changing climate and fertilization from elevated CO₂.

Extended CV

Employment History Continued

Research Assistant

Jun 2014-Sep 2014

Biosphere & Climate Dynamics, Department of Biological Sciences, Macquarie University, Ryde, NSW, Australia

Modelling changes in past and future vegetation-fire dynamics, and its feedback on terrestrial and atmospheric carbon.

Research Assistant

Sep 2008-Sep 2010

Department of Geographical Sciences, University of Bristol, UK

Developing a coupled DGVM-fire model and applying the model to: test the effectiveness of different fire management techniques in current and future climates; and simulate paleo vegetation and carbon stocks.

Earth System Science Summer School coordinator

Apr 2008-Sep 2008

Department of Earth Sciences, University of Bristol, UK

Publicity; lecture and seminar timetabling; finding and organising guest lectures; general admin.

Widening Participation

Sep 2007-Sep 2008

Widening Participation Office, University of Bristol, UK

Working with students in primary and secondary education to encourage university attendance from low socio-economic backgrounds: helping organise & run University open days and campus tours; school presentations and career evenings.

Awards

Macquarie University Research Excellence Scholarship (iMQRES)

2010-2014

Macquarie University, Ryde, NSW, Australia

Postgraduate award for completion of PhD

Postgraduate Research Fund (PGRF)

2013

Macquarie University, Ryde, NSW, Australia

Competitive award to enhance postgraduate research experience. Funded attendance at the 2013 AGU fall conference in order to present DGVM development and future projection of fire regimes and terrestrial carbon stocks under climate change

Biology postgraduate conference best presentation

2011

Biological Sciences, Macquarie University, Ryde, NSW, Australia

Best presentation out of the departments 78 postgraduate students at the annual postgraduate conference. Awarded for presentation on a vegetation model benchmarking system

Extended CV

Current Research Interests

My research focuses on improving our understanding of the interactions between vegetation and climate, and exploring how these interactions impact terrestrial ecosystem properties such as composition, disturbance regimes, and carbon and hydrological cycles. Much of this involves utilising experimental and satellite data for more observation-driven vegetation model development and benchmarking. Most of this has been exploring climate and vegetative controls and fire, and the impact fire has on ecosystem, atmospheric emission and the carbon cycle, and vegetation-controlled hydrology. I am also involved in projects that explore plant resource allocation, phenology and drought recovery strategies.

My current research projects include:

Development of the LPX coupled Dynamic Vegetation-fire model

douglass3.github.io/lpx-dynamic-global-vegetation-model

Much of my thesis focussed on the assessment and development of the LPX-DGVM-fire model to better represent fire and fire-adapted vegetation in tropical savanna ecosystems. Continued development strands include:

- Improving fire-model performance for forest ecosystems
- Parameterization of the carbon cycle and trace gas emissions
- Continued development of disturbance resilience and resistance traits - e.g. resprouting after fire and drought.

Vegetation model benchmarking and inter-comparison

douglass3.github.io/vegetation-model-inter-comparison-benchmarking

I am the main developer and maintainer of the most widely used vegetation-model benchmarking system, which qualitatively assesses model performance for a variety of vegetation and land surface processes. Current work includes:

- Incorporation of fire regime observations
- Inter-model comparisons for the fireMIP project
- R software package development

Vegetation disturbance resistance and recovery databases

douglass3.github.io/traits-for-resistance-and-recovery-to-disturbance

I have been one of the lead collaborators on compiling several databases describing site based disturbance resistance and recovery traits across plant species, disturbance regimes and climate gradients. These include:

- Bark Thickness as protection against fire.
- Resprouting as a recovery to extreme fire and drought disturbance.
- Post-fire re-seeding strategies.

Plant resource allocation strategies

More recently, I have become involved in research projects exploring wider vegetation dynamics and responses to environmental change, including:

- The testing of conceptual carbon allocation strategies in a vegetation model framework, and the response of these strategies to changing climate and increasing CO₂ fertilization.
- Development of a simple dry-season phenology model for tropical grass and woodland ecosystems.

For more detail on all these projects, see douglass3.github.io/pages/research-interests

Workshops and Consultancy Visits

Using plant functional traits to predict ecosystem vulnerability to changing fire regimes

Australian Centre for Ecological Analysis and Synthesis (ACEAS)

Oct 2013

University of Queensland, Brisbane, QL, Australia

Data Synthesis workshop for fire resilience and response analysis

Extended CV

Workshops and Consultancy Visits Continued

Fire response traits database

May 2013

Macquarie University, Ryde, Australia

Workshop on construction of a database describing distribution of different resprouting traits in climate space, as part of the Australian Centre for Ecological Analysis and Synthesis (ACEAS) Working group "Using plant functional traits to predict ecosystem vulnerability to changing fire regimes"

Technical Assistance for Climate Change

Oct 2009

Royal Society for the Conservation of Nature, Jordan

Report on Impacts of Future Climate Change on Vegetation, Fire, and Runoff in Jordan

Training Courses

An Introduction to Research Impact

Jun 2016

University of Reading, UK

Understanding & identifying potential impact of research including economic, social and policy, and how to write impact summaries and "pathways to impact" for grant applications.

Software Carpentry

Feb 2013

Programming philosophy, code structure and version control

Genses2Geoscience: Writing for journals

Aug 2012

Macquarie University, Ryde, NSW, Australia

Drafting and writing journal articles and research proposals

Genses2Geoscience: Database Construction using sql

Sep 2011

Macquarie University, Ryde, NSW, Australia

Managing data held in a relational database management system

Genses2Geoscience: Teaching in small groups

Aug 2011

Macquarie University, Ryde, NSW, Australia

Effective questioning, encouraging equal participation, and managing student behaviour.

Planning and writing journal articles

Nov 2009

University of Bristol, UK

Skills

Vegetation modelling

I have been lead developer on LPX - a high-complexity coupled Dynamic Vegetation-Fire Model - since 2009. LPX has both Fortran and C++ components for fast (relative to it's # complexity) computational times. I have recently also added a shell and R interface to facilitate parallisation and to allow outputs to be easily analysed and plotted.

See douglass3.github.io/LPX for more information.

Statistical Programming

Most of my research involves statistical analysis of large datasets and model outputs. Collaboration on many of my projects means I am fluent in most widely used statistical programming languages. Most of my work is in either R, Python or Matlab, but I have also performed graphical and statistical analysis using Fortran and C amongst others.

See douglass3.github.io/my_best_plots for examples of R plots from my PhD.

See douglass3.github.io/lpxbenchmarking for an example of statistical benchmarking of extensive model outputs against global raster and site-based datasets.

Extended CV

Skills Continued

Web Design

In my spare time, I have developed dynamic websites using open source content management system (such as Concrete5 and Wordpress). Also, my personal site is on a static host, but is maintained using a Python based dynamic-site emulator. Developing and maintaining these sites has allowed me to become familiar with many web design software packages and fluent in HTML/CSS, PHP and Markdown. I have also linked Markdown with R and Python when sharing and presenting results from model development and analysis.

See eppingdac.com.au, an example of a website I have developed using Concrete5 content management system

See douglask3.github.io, an example of a website produced using a simple dynamic-site emulator.

Publishing

As well as publishing papers, I have also written manuals, reports and newsletters using a variety of languages and software products, including (aside from standard office/open office):

- Latex - this includes my thesis, available at www.goo.gl/9YjwKw
- Scribus - my running club newsletter, available at eppingdac.com.au/news-and-views/newsletter
- Photoshop/Illustrator and GIMP (the open source equivalent). See flickr.com/doug_from_the_uk for examples of graphical art and photo "touch ups"/manipulation.

Software Tools

I have developed and maintained several software packages related to my research projects or to help organise work flow with collaborators. Some of the most used are:

Vegetation Benchmark Metrics

An R-package containing the metrics and basic statistical models relating to my work on Vegetation model benchmarking.

See douglask3.github.io/vegetation-model-benchmarking for more information.

Git-based R project Tracking

Tools for tracking r-projects version controlled by Git.

See douglask3.github.io/git-based-r-project-extras for more information.

LPX

Running, storing, analysing and plotting the LPX-Dynamic Global Vegetation Model.

See douglask3.github.io/lpx-dynamic-global-vegetation-model for more information.

For a more comprehensive list, see douglask3.github.io/pages/tools

Extra-Curricular

Committee Member responsible for web-design communications, and social runners

Feb 2011-May 2015

Epping and District Athletics Clubs North Epping, Hornsby, NSW, Australia

Website development (www.eppingdac.com.au); designing, producing and distributing newsletter and e-publicity for local community running and athletics club

RDA volunteer

Dec 2012 - Feb 2015

RDA - Riding for the Disabled, Ryde, NSW, Australia

Funding raising & publicity; feeding horses

Group discussion chair

2011 - 2013

Biosphere & Climate Dynamics, Department of Biological Sciences, Macquarie University, Ryde, NSW, Australia

Organised and chaired group meetings and paper discussions

Extended CV

Extra-Curricular Continued

Outreach volunteer

2010 - 2011

Genses2Geoscience, Department of Biological Sciences, Macquarie University, Ryde, NSW, Australia

Demonstrated department research during school tours of the University

Student Union involvement

2002-2009

University of Warwick and University of Bristol

Sabbatical year sitting on board of directors of Warwick Students Union, responsible for the Student Advice and Welfare department; 3 years as charity trustee and 6 years on student council responsible for Science Faculty representation; committee posts on various student-run sports clubs and societies including People and Planet, Student TV station, Student Support Groups, and running clubs

Digital photography: creating and sharing better images

2010

Open University, UK

Open University undergraduate course in digital photography and image manipulation

See www.flickr.com/photos/doug_from_the_uk
